

Employer Statement – Ahsan Khan (Lineryg Manufacturing)

Taha Malik worked as a Co-Op student at Linergy Manufacturing with a high level of competence. He contributed towards making Linergy's design and manufacturing processes efficient and safe. He regularly completed his assignments involving advanced design techniques along with utilizing tools and skills applicable to industrial processes. His work was found to be at a high level of quality, while he displayed significant initiative and an extreme willingness to learn. To cite an specific example, Taha worked to improve current procedures at Linergy when he created a computer program to automatically read dimensional data and create Process Capability (Cpk ) graphs which had a potential for enhancing product quality. He was also well versed in CAD modelling/drafting which he used to manufacture fixtures & gauges, tools, and other objects to improve production processes. Taha was able to create schematic diagrams of high-voltage machinery to aid in energy source identification, isolation and de-energizing high energy outlets to create a safer work environment for operators and maintenance crews. He completed his co-op term surpassing all expectations demonstrating excellent work ethics. In general, I was very impressed working with Taha and can easily recommend him for the Co-op Student of the Year award.
